

Stone Setter

The *Stone Setter* is a powered trailer designed to lift and carry monuments.

The *Stone Setter* allows one person to do more - quickly, safely, and easily.

- Powered by an electric start 13 hp Honda engine the maneuverable *Stone Setter* can deliver monuments over rough terrain, up inclines, and through narrow passages.
- The padded side rails allow tablets to stand upright during transport.
- The Amco Veba hydraulic crane quickly and easily moves monument pieces.
- Carry all your setting tools and supplies with you in the toolbox to eliminate extra trips carrying tools from the truck to the job and back.
- Eliminate the expense of running a large crane truck with bad fuel economy. Tow the *Stone Setter* with a 1/2 ton pickup truck.
- Large deck space (8' x 4') with 3000 lb payload capacity.
- The *Stone Setter's* chassis is based on the proven burial vault carrier design. You can deliver monuments anywhere the vault company can place a burial vault.

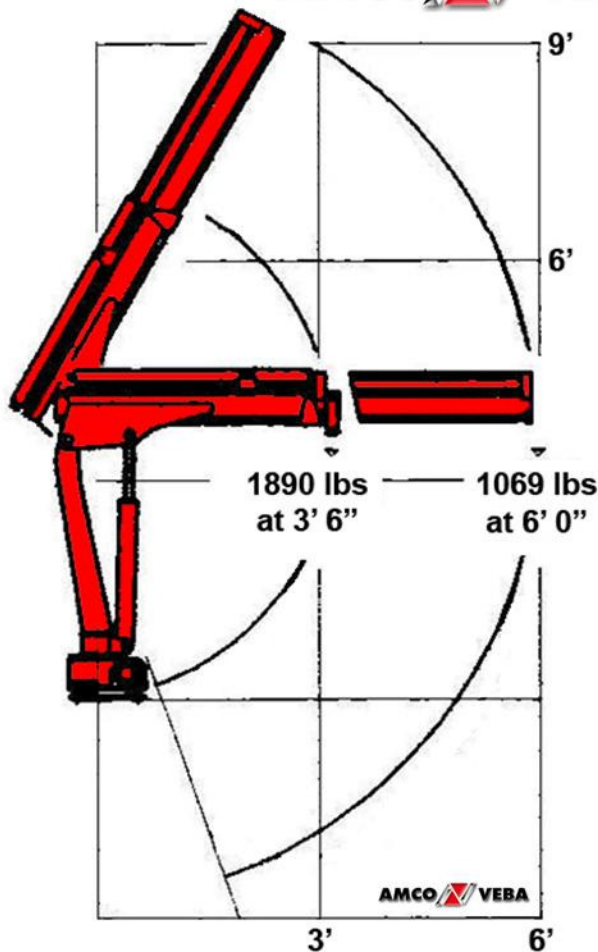

Transporting Monuments

Padded side rails and ratchet straps securely hold polished tablets during transport.

AMCO VEBE Crane Features

- Smooth Proportional controls
- Power Rotation
- Power Extension
- Low Maintenance
- Long service life

*Single-handed control of every crane function.
Proportional speed control of any single movement.*

The wireless remote is designed for one hand operation. The operator can keep one hand on the monument to guide it while controlling the crane. The remote controls every crane function.
