

Model J Automatic Sandblaster

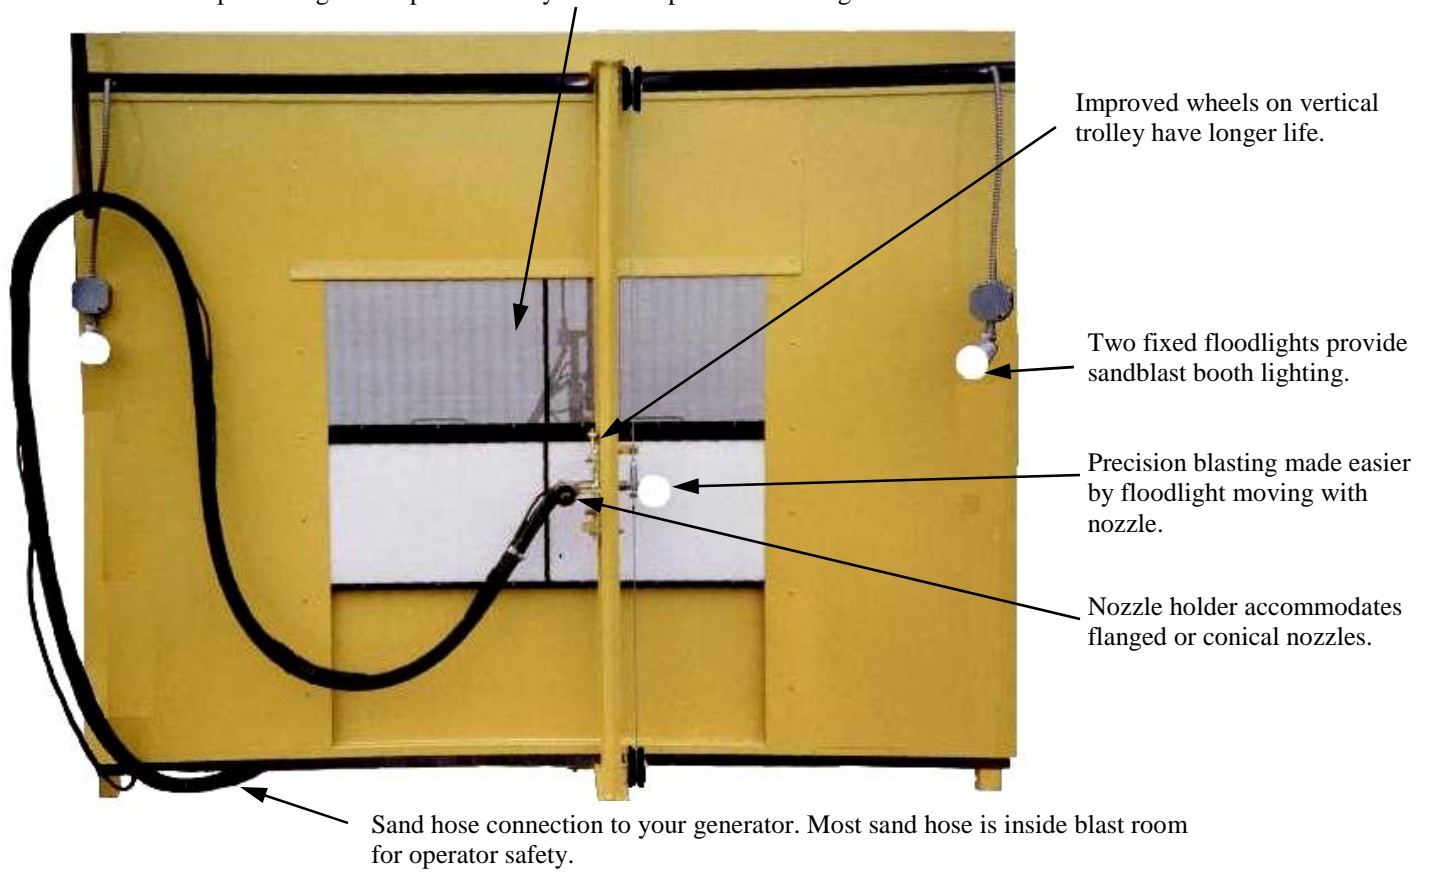

The *Model J Automatic Sandblaster* is a complete front for a sandblasting booth. It has been proven to reduce labor costs and perform under the most demanding conditions for hundreds of retail and wholesale companies.

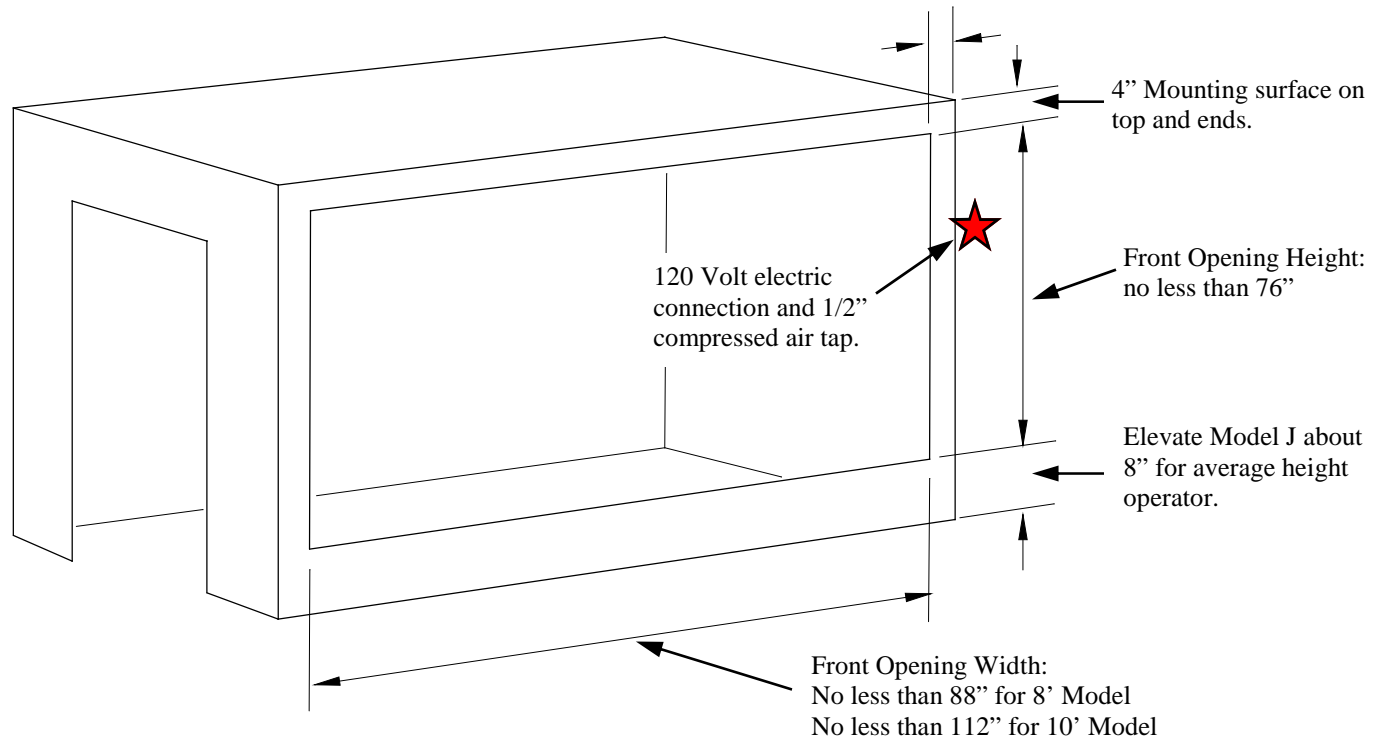

- ◆ Installs in less than a day. It is fully assembled and tested
- ◆ Designed for the constant motion of automatic sandblast. Not an attachment to a manual curtain. No exposed short life components.
- ◆ Full range of speeds and independent control of horizontal and vertical motion. Speed of motion is adjustable during operation to “fine tune” coverage.
- ◆ Electrical power interruption will not stop nozzle motion in mid-stroke. Compressed air power will continue moving nozzle to extreme end of track. This safety feature provides time for operator to shutdown generator sand flow.
- ◆ Available in two sizes:
 - 8’ Model with 60” horizontal travel.
 - 10’ Model with 84” horizontal travel.Both models have 30” vertical travel that is easily adjustable within 55” vertical range.
Note - Option available for up to 52” travel.

More Pleasant And Healthy Working Conditions

Fully sealed room front has fine mesh stainless steel vision screen to minimize abrasive escape. This provides greater operator safety and more pleasant working conditions.

The Model J Easily Mounts On Your Present Booth And Can Be Moved As A Unit In The Future

Options Available For Model J

Preset Counter Option

An electrical controller that counts the number of vertical passes over the work area. When a preset number of passes is reached the counter turns off the blast generator. Use in place of the hand held dead man valve supplied with most blast generators.

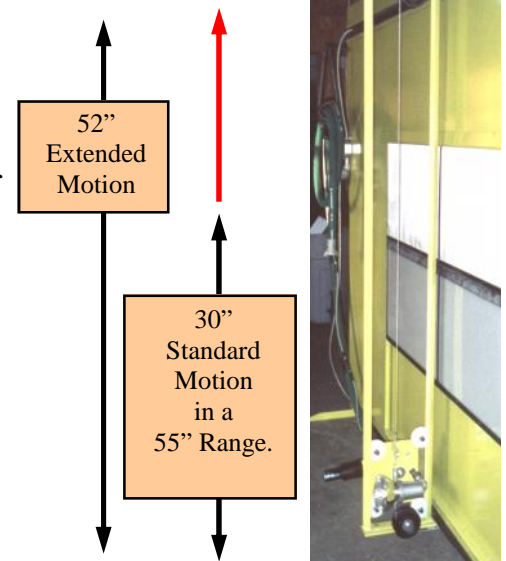

Price: \$1300

Extended Vertical Motion Option

A standard Model J provides 30" of vertical nozzle travel that can be set anywhere on the 55" track. A manual adjustment of the nozzle position is required. This option provides up to 52" of continuous vertical motion by the nozzle as it sweeps across the work area. No manual adjustment is required.

Price: \$490

Manual Rubber Curtain Option

Rubber curtain that is inserted in bottom half of front opening. This curtain allows manual sandblasting through front of Model J.

Price: \$260

Protective End Panel Option

Protective panels overlap each end of tablet to guard against accidentally frosting ends and back of tablet.

Price: \$260
